

THE ARNE JACOBSEN MINIATURE-/ DOLLHOUSE

Many people have patiently been waiting and finally it's ready for new inhabitants. Minimii's miniature-/dollhouse with all refinements; a true copy of Arne Jacobsens villa in Charlottenlund built in 1929.

The miniature house is suitable as a design icon for exhibition as well as a beautiful miniature-/dollhouse in your home. Arne Jacobsens sense for thorough and user friendly design is executed in scale 1:16 (3/4") with few adjustments, which only makes the house more accessible and play-friendly. An attractive and unique miniature-/dollhouse with many fine details which encourage play for children and adults.

The AJ MiiBox™

The MiiBox™ is a wall hanging Arne Jacobsen miniature-/dollhouse, also in scale 1:16. The MiiBox™ is an innovative design object for the living room, kitchen, bathroom or nursery. Use the MiiBox™ like a little dollhouse the whole family can play with and decorate, or use it to store any of your other small treasured things. The MiiBox™ is made in the same quality as the miniature-/dollhouse, but takes up only half the space as the full AJ House. The facade is hinged enabling you to open it downwards 180° while decorating the MiiBox™.

The Details

When buying an Arne Jacobsen miniature-/dollhouse or an AJ MiiBox™ from Minimii each unit features among others engraved official production certificate executed in brass matching the doorknob. Outer fences in white painted metal, windows with real sills, shutters, 3 detachable facades steered into place by magnets, beautiful and durable white and black painted surfaces, and of course corners cut into smi. Inside the house features a green marble painted fireplace and real doorframes.

Play For All Ages

Minimii's mission is to produce and market miniature-/dollhouses and MiiBoxes™ with furniture and accessories in a high quality designed by international acknowledged architects and designers. Minimii wants to bring the world beautifully designed quality toys for children and adults, and to disseminate the knowledge to good design in a yet unseen and accessible manner.

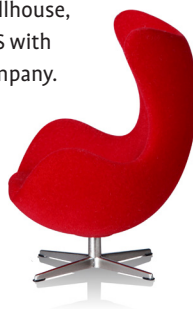

Minimii produces play friendly miniature-/dollhouses, furniture, art and decor, which are true small copies of real full size solutions. Houses where real people live, who inspire to play, and preferably with an interesting architecture. With the stylish, functional and timeless design – in mini size – children's fantasy can run wild, also with mom and dad, who let the play take place in the middle of the living room, with the Arne Jacobsen House's beautiful toy universe and completed details.

About Minimii

The idea behind Minimii is Linda Stenberg's. With her sense and interest for design and quality combined with a life as busy mother of three she got the idea back in 2009. Linda was hunting for a dollhouse for her two oldest daughters and she found only old Victorian styled dollhouses furnished like her grandmother's house with terrible old brown chairs. She then got turned on by the idea of creating a Danish modern quality dollhouse, which both she and her daughters found attractive. Linda runs Minimii ApS with business partner Claus Højer Hansen, who is managing director for the company.

Today Minimii's mission is to produce and market miniature-/dollhouses with furniture and accessories in a high quality designed by international acknowledged architects and designers.
